PROJECT - MYFUNDBOX

MYFUNDBOX is a subscription billing and payments orchestration platform that enables businesses to manage and accept payments online. MYFUNDBOX customers can raise invoices, make recurring and one-time payments globally with leading payment gateway like STRIPE, MOLLIE and GOCARDLESS etc. I contribute for the growth of the product and collaborate closely with software developers and scrum master to identify and resolving defects of the product. Participate in agile/scrums meetings, Providing testing updates and contributing to sprint planning. Together with I worked in other product of MYFUNDBOX called FUNDRAISING CRM

- Create an intuitive and visually appealing interface for product design.
- Monitoring server logs and errors promptly, and reporting it to the system administrators and developers
- Providing customer service and resolving customer technical queries over live chat (Intercom)
