Skills

- Quick learner
- Communication
- Data analysis
- Ability to multitask
- Knowledge of regulatory standards
- Flexibility and adaptability

Projects

- Business Responsibility and Sustainability Report (2023 - Present)**
Globally, there is an increase in awareness and activism amongst stakeholders who are demanding business accountability for the social and environmental impacts on issues such as climate change, gender equality, environmental degradation, etc. Sustainability Reporting is an emerging discipline encompassing the disclosure and communication of an entity's non-financial - environmental, social, and governance (ESG) performance and its overall impact. Over the last few years, more and more entities are now preparing and disclosing their sustainability reports either under a mandate or voluntarily as per the reporting frameworks/ standards provided by standard-setting bodies/ regulators.
