### Responsibilities:

**Knowledge Management:** Contributed to the Knowledge management team by building various technical documents including Standard Operating Procedure (SOP).

**Resource Utilization:** Prepare team's resource utilization and publish daily status report to senior management.

- Design and developed website using HTML, CSS, JavaScript and bootstrap5.
- dealer commander is main project in that there are three types of sites. standard, pro,enterprise as per client requirement we have to design sites, as client provide logo & all information related to that project
- using FileZilla we have to convert it as we have to manage all Front end designing part any website having header,footer,main content,adds at right side
- so, we have to check all that part convert it as per client requierment.so i have designed target office supplies websites.

- updated new banners to brodawaygrill & Pizza paradise website also changed footer content.
- solved all the PDF issues in united supplies website.
- designed business equipment website.
- As per client requirement we have to make changes in all request & every size having 6 & 10 sizes  
(eg:300x250,160x600,300x600,728x90,970x90,1024x768,970x250,320x50,300x50)
- copy request id & paste on dell share on dell share we get all details of that request.
- client has provided brief for all request every size having different logo size text format, font family so we have to adjust all thing with all guidelines
- create 1 main folder in our shared location rename it by our id ,create sub folder brief save our brief & NA brief in that. some time client had provided pick up(html files) so pick up form there
- sometime not at this time we have to download zip file from DAM create 1 folder peast there all files rename it as template also download QRG for particular request.
- every size having 6 frames & every frame having different product & product name, sometimes 2<sup>nd</sup> frame consist Lifestyle image depending on request & last frame is Brid sheet.
- We had to save 5<sup>th</sup> Frame as fallback image file size is 35kb.
- All products & Screen fill which is mention in our brief will download from DAM, After downloading update screen fill in photoshop & save it.
- After that update all texts & updated products which is mention in brief align it in all sizes. Get screenshots for all sizes & make pdf also save jpeg file for all sizes.
- In PDF mention Dell & windows logo size at top of that size which is mandatory.
- After saving PDF make GIF animation for all sizes with 2.5 sec & Self audit ones & send for audit the auditor will check all & upload to dell share
- For static (SM) request pick up form path as per guideline put dell & windows logo also add headline, subhead, badge which is having color ,background with product & product name, some gradient at the top of page
- Windows text at bottom of the windows logo & save jpeg file less than 250KB & gif file update pdf.
- Apart from this I had given training to my junior.
- It is one of the global largest website of qualified and experienced radio logistics, focused and dedicated on fast reporting of higher quality globally and locally clients.
- It offers services to hospitals, diagnostic centers individual radio logistic govt. health organization, NGO and public private partnership
- Website URL :<http://futureteleradiology.com/>
