Junior Software Developer

PROFILE

Driven by a keen interest in Java programming, I'm eager to embrace roles that not only leverage my one-year experience but also push me to hone my skills in developing robust and scalable software. I take pride in delivering high-quality code and thrive in collaborative team environments, ensuring the triumph of every project.

SKILLS

- **Java**
- **HTML**
- **CSS**
- **Javascript**
- **React.js**
- **Springboot**
- **SQL**
- **Angular**
- **Hibernate**

WORK EXPERIENCE

KKS Tech Solutions Private Limited
Bangalore

EDUCATION

M.M.E.S art's and science women's
college
BSC Computer Science

PROFILE SNAPSHOT

- An adept Java developer, I have spent a year mastering web application creation using leading **Java** technologies.
- My proficiency with **Java**, **Spring Boot**, and **Hibernate** has ensured optimal website performance. I'm also skilled in creating intuitive user interfaces by collaborating with front-end teams using **HTML**, **CSS**, **JavaScript**, and **ReactJS**.
- My experience with RESTful APIs, especially with **Angular**, has honed my grasp of HTTP protocols.
- Prioritizing security, I implement robust authentication measures.
- champion in software quality, always seeking **bugs** through rigorous testing.
- With a deep understanding of **Git**, I support smooth codebase management.
- I thrive in **Agile** setups, consistently participating in sprints and stand-ups.
- My expertise extends to integrating **RESTful APIs** into Angular, a testament to my solid understanding of HTTP.

HANDS-ON ACHIEVMENT

E_COMMERCE

Project Title : DirectBuy

Duration : Oct 2022 – Present

DirectBuy

A Merrillville, Indiana-based membership service where members pay a fee to purchase products at discounted rates, directly from manufacturers and authorized suppliers. Offers products across categories like home furnishings, home improvement, entertainment, outdoor items, flooring, and accessories.

CONTRIBUTIONS

- Assist in developing efficient **Java**-based web applications, focusing on functionality and basic scalability.
- Develop basic web interfaces using **HTML**, **CSS**, **JavaScript**, and **Angular**, ensuring functionality and user-friendliness.
- coding standards and guidelines to produce clean and efficient code under the guidance of senior developers.
- Work closely with **UX/UI** designers, product managers, and fellow developers to achieve project goals.
- Developed and maintained backend applications using Java and the **Spring Boot** framework.
- Contribute to the team's goals and deliver tasks on time ensuring regular updates on progress.
- Participate in code review sessions, learning from feedback and insights from senior developers.
- Handle basic operations with relational databases, making use of frameworks like **Hibernate**.
- Assist in developing and maintaining simple **RESTful APIs**.
- Help with integrating third-party services under the supervision of experienced developers.
- Integrated Spring Data JPA for data persistence and employed Hibernate as the ORM tool for communicating with the **MySQL** database.
- Developed dynamic and responsive web applications using **ReactJS**
- The responsibilities are geared more towards learning, growing, and contributing to the team in a supportive role.

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.
