Personal Projects

☐ **Create IntakeRoket web base App :**
Leveraged TypeScript, Redux Toolkit, and Redux Thunk to craft a robust and efficient web-based platform, showcasing expertise in modern web development technologies and state management.

☐ **Prepare E-commerce website on React-JS with the help of context API :**
Using the concepts of React-Router-Dom, Props, and Hooks I have created a responsive e- commerce website and with the help of Context API I have created a global store and wrapped the app component with the help of a provider.

☐ **Create Weather forecast Responsive Website on Node-JS :**
With the help of express-JS, a few concepts of Vanilla-JS and CSS I have created a responsive Weather Forecast website. And create the server for the website on Node-JS.

Skill Strength

- MS Office
- Visual Studio
- GitHub

- Adaptability
