Hitesh Kataria

Team Leader

👤 Profile

To pursue a challenging career in the field of Software Development so that I can utilize my Information Technology skills effectively and efficiently. Also seeking an organization, where I can explore my innovative skills and contribute to its success.

💼 Employment History

Team Leader at Bytespark Digital, Ahmedabad
September 2022 — Present

Project Planning: Collaborate with project stakeholders, such as business analysts, to understand project requirements, timelines, and deliverables. Create a clear road map and plan for the project execution, defining tasks, milestones, and resource allocation.

Team Management: Supervise a team of PHP developers, including hiring, training, and mentoring team members. Encourage a positive and productive work environment, foster teamwork, and resolve any conflicts that may arise.

Task Assignment and Progress Monitoring: Assign tasks to team members based on their skills and expertise. Monitor the progress of tasks and projects, addressing any delays or roadblocks promptly to keep the project on track.
